【NEO-G Feature】

- NEO-G shrink wrapper is designed for handling Gable Top carton. Auto feeder separates and feeds products one by one at even intervals.
- Feeding products becomes easier than attachment type infeed conveyor by adopting infeed conveyor without pushing attachment.
- NEO-G equips static longsealer as standard that makes no film scrap and uses less electricity for more friendly. In addition, the back print will be vivid because there is no seal line for static seal.
- NEO-G has one film holder so the machine length is shorter than other Tokiwa wrapping machines.
